

Are solar panel lease programs a good idea?

For these homeowners, solar panel lease programs can be a great option, as they allow homeowners to get solar installed and eliminate their power bills without having to make the commitment to owning a system. Let's take a look at how solar panel lease programs work and the benefits of going with a solar lease. **How Do Solar Panel Leases Work?**

What is solar panel leasing?

Similar to when you lease a car and drive and use it without paying the cost of the vehicle, solar panel leasing lets you lease solar panels to generate electricity. You may also hear it referred to as solar financing, solar power purchase agreements, or solar rental programs. **How Does Solar Panel Leasing Work?**

How do solar panel leases work?

Solar panel leases work similar to car leases. Much like with a car lease agreement, the leasing company owns the solar panels, and the homeowner pays a monthly payment to that company to use them. In the case of leased solar panels, the "use" of the panels is the use of the power they create.

What is a solar lease?

You can think of a solar lease like a car lease - it's a form of third-party ownership (TPO) where you don't own the product that you're paying for. Under a solar lease, this third-party owner (e.g., a solar company) installs solar panels on your property and then sells you the electricity produced at a predetermined monthly rate.

Should you lease or buy solar panels?

Homeowners do get to take advantage of net metering, so the solar panels still lower or eliminate their electric bill. Solar leases provide predictable monthly payments, increase access to solar, and have no maintenance costs for the homeowner.

Can you sell a solar system under a lease?

Under a solar lease, you won't own your solar system, but will still benefit from its generated electricity. A leased solar system can make selling your home more difficult because the next owner may not want to take over your lease payments. **What is a solar lease?**

With PPA's, you are charged per kilowatt-hour for solar energy produced, so leasing is a better bet. **Solar Panel Leasing Cons. ...** Depending on the lease program and terms, you may be able to ...
