Who is the best solar company in Louisville?

Here are the top companies we recommend for solar in Louisville: Several friends also have used Sam Avery (Avery and Sun) for their Solar systems with excellent results. By having a solar power system installed, you can decrease your carbon footprint, greatly reduce your utility costs, and increase your property value!

Do I need a solar battery in Louisville?

No,you don't need to install a solar battery in Louisville. Solar panels can operate and lower your electricity bill even without a battery. However,a solar battery might be a worthwhile investment in some cases. A battery can provide backup power and priceless peace of mind in places with prolonged grid blackouts or extreme weather events.

Who should I choose for solar in Louisville?

We look for solar companies with owners who understand that when they sell you a solar system, you expect them to be there for the next 25 years to fix any issues that may arise. Here are the top companies we recommend for solar in Louisville: Several friends also have used Sam Avery (Avery and Sun) for their Solar systems with excellent results.

How much does solar cost in Louisville?

The average price of solar is about \$1.87 to \$2.81 per watt in Louisville,so anything in that range is a fair price. Some prices may be too good to be true. If your installer quotes you way below the average price in your area,proceed with caution. Installers must charge fair prices to remain in business and provide you with 25 years of support.

Are solar incentives a good idea in Louisville?

Solar incentives and rebates can cut the cost of installing solar in Louisville by thousands of dollars. The most significant incentive is the 30% federal solar tax credit,available to any taxpayer in the country when they purchase solar panels or battery storage.
