

How much do solar panels cost in Maine?

The average Maine homeowner needs a 10.15 kW solar panel system to cover their electricity needs, which comes out to \$33,080 before incentives. Prices range from \$28,118 to \$38,042, but after the federal tax credit, that drops by 30%. While this is a lot of money, adding solar panels will help you avoid paying Maine's high electricity rates.

Does Maine have solar energy?

The available sunlight in Maine is generally conducive to solar energy. The state as a whole receives 192 sunny days per year, which is often plenty for homeowners to see substantial value in their solar panels.
