

What is a Sunforce solar motion activated security light?

Powered by sunlight, the new Sunforce solar motion activated security light is the perfect solution to illuminate and add an extra layer of security to any area of the home. The new dual brightness feature allows you to adjust the light's output from 1000 lumens to a powerful 2000 lumens.

How does solar motion activated light work?

This newly designed solar motion activated light automatically turns on when motion is detected.

What is a solar motion light?

Although a solar motion light provides a sense of security, it can also be used as decoration, or to light up small yards/gardens or driveways. They can come in handy, especially during blackouts, since they are independent, unconnected to an electricity grid.

What is motion-activated high light?

Motion-activated high light activates only when it detects motion. VOSONX solar powered lights are among the brightest lights in the market with 126 LEDs, providing 850 lumens of bright light and illuminating up to 1,200 sq ft of land. This product has a high sensitivity.

Do solar motion lights really work?

As mentioned above, people tend to use the solar motion lights for security purposes rather than for illuminating their gardens at night or making their backyards pretty. However, sometimes solar powered lamps can do it all. VOSONX lights are the best example. Their 3 lighting mode options make this possible.
