

Is solar electricity cheaper than grid electricity in New York State?

Solar electricity - even with battery storage - is substantially cheaper than grid electricity in New York State. Going solar also fixes your electricity costs at a low rate, similar to buying a house to hedge against rising rent costs.

How much does solar cost in New York?

Interested in going solar? You'll need to install a 11.35 kW solar panel system to cover the average electric bill in New York, which will cost you about \$23,353 after the federal tax credit. As long as your federal tax bill is high enough, you can take advantage of the federal investment tax credit (ITC).

Why is solar energy important in New York State?

Solar energy is an essential component of New York State's goals for reducing greenhouse gas emissions and ensuring an affordable and resilient energy system. The Climate Act set a goal of installing six gigawatts (6 GW) of distributed solar energy by 2025.

Does New York State have solar?

NYSERDA has created two data maps on the State's installed solar. Gain a holistic view of the solar installed in New York State. Discover installed capacity, number of projects, and annual trends for completed projects through aggregated data from NYSERDA, NYS Department of Public Service (DPS), and the New York Independent System Operator (NYISO).

Can New Yorkers save money with solar energy?

All New Yorkers can save with renewable energy from the sun. Whether you own or rent your home, live in an apartment, house, or condo, have an older home or a brand-new build, there's an affordable way to power your home with solar energy. Ready to get started? Rooftop solar is the most common option for on-site solar installations.

Is going solar a good idea in New York State?
