

Are solar panels the right choice for your NZ home?

Solar panels have gained significant traction in recent years, thanks to advancements in technology and a decrease in Photovoltaic Panel (PV) pricing over time. There is also an increasing emphasis on using renewable energy sources in NZ. But is investing in solar panels the right choice for your NZ home?

What is the best solar panel in NZ?

If you're a large family or in need of more power than usual, Hyundai's HiE-S350SG might just be the best solar panel in NZ for you. Hyundai's solar panels come in 350W and 390W to help you store and utilise more solar energy. The HiE-S350SG model measures 1068mm &#215; 1622mm &#215; 35mm and weighs 19.8kg.

Where to look for solar panels in New Zealand?

If you don't know where to look for solar panels, here are some of New Zealand's best solar power companies you can check. Go green and solar with Harrison's Energy Solutions. They provide consultation and installation of solar panels or PV systems for your home or business to make sure you're maximizing your ROI.

Why should I buy a solar power system in New Zealand?

**Lower Energy Bills:** By generating your own electricity, you can significantly reduce your monthly electricity bills. Excess energy produced by your PV panels can even be sold back to the grid in some regions, further offsetting costs. Some power companies in New Zealand do not pay much for this power so you should shop around.

Are solar panels a good investment in New Zealand?

Not only will you save money on electricity bills, but it will also help reduce your carbon footprint and help New Zealand reach its goal of being carbon neutral by 2050. If you don't know where to look for solar panels, here are some of New Zealand's best solar power companies you can check. Go green and solar with Harrison's Energy Solutions.

How long do solar panels last in New Zealand?

The thermal solar panel system saves greatly on the PV solar power system and roof space. The best solar panels in NZ generally last for 20 years or longer, so it makes sense that you should find a warranty equal to that number. Or if not, at least you should get a solar power system with a 10-year warranty.
