SOLAR PRO. Solar power plant in punjab

How much solar power does Punjab have?

The northern state of Punjab has an installed solar capacity of 1118 MW. Recently, Union minister of new and renewable energy and power RK Singh stated that Punjab generated over 6,034 million units (MU) of solar power in the last 4 years, a figure which was much higher than any state in the northern region.

Why is solar energy important in Punjab?

That allows businesses to generate electricity through solar power throughout the year. Since 2012, solar energy installation in Punjab has been steadily increasing. From zero in 2010 to 136.4 MW in 2019, the installed capacity of rooftop solar systems has increased by more than 100 times in the state.

Where is Punjab's first solar power plant located?

Punjab has installed the country's first satellite-controlled single-axis tracking east-west tilt technology-based solar power plant at Lalpur village, with a capacity of 4.2 MW.

Why is solar capacity increasing in Punjab?

Given that a solar system takes significant investment, this increase in capacity reflects consumers' acceptance of solar and its benefits. The northern state of Punjab has an installed solar capacity of 1118 MW.

How much solar power does a small business need in Punjab?

A solar plant capacity of up to 100kWis enough for small and micro businesses in Punjab. The energy consumption of these industries is very big, so these industries need 500 kW or more capacity solutions. In Punjab, there are approx. 2,52,741 manufacturing companies. How Can We Help?

What is solar subsidy in Punjab?

The solar subsidy in Punjab is anticipated to lower solar panel costs in Punjab for consumers in the residential sector. The Central Financial Assistance(CFA) or subsidy for a rooftop PV solar system will be determined by the system's capacity. A fixed per-kilowatt rate is prescribed across different system capacity slabs.
