

Does a solar pond water fountain use solar energy?

The Airmax SolarSeries Pond Solar Fountain uses renewable solar energy to produce crisp, beautiful spray patterns. Let the sun power your solar pond water fountain!

What is a solar pond fountain pump?

A solar pond fountain pump is a device that uses solar power to create a water fountain in a pond. This specific model includes a solar panel with an interior battery, creating a waterfall up to 2.62 feet high with a maximum flow rate of 53 gallons per hour.

Will a solar pond fountain turn off if water level is too low?

The solar pond fountain will immediately turn off if the water level in the pond gets too low. Adding a water movement to your pond, this solar-powered pond water fountain with LED lights can help you relax while enjoying the visual and audible treats of the pond fountain.

How do floating solar fountains help fish ponds?

By making waterfalls of different height and width, these floating solar fountain models help to keep the water clean and safe for fish, if they inhabit the pond. These solar-powered fountains include models suitable for ponds and fish ponds, and some do a good job of aerating the water.

How does a solar pond fountain prevent odors?

The solar pond fountain is a great choice for mixing the water levels and aerating the pond water to stay environmentally friendly for your fish. It will also prevent odors from contaminating the water along with the bacteria and algae.

Does the Solar Pond Fountain need a nozzle?

The Solar Pond Fountain does not require a nozzle. The Classic Spray Pattern comes pre-installed on the SolarSeries solar powered water fountain, creating a beautiful, classic V-shaped pattern and a relaxing sound as the water breaks the surface.

The SolarSeries is the leading solar water fountain, delivering alternative energy for pond and lake owners. Discover all our solar solutions at Airmax.
