

Who is the Solar Power Pro?

While some installers and companies install solar panels and systems as a part of their business - this is our business. The Solar Power Pro works exclusively on Solar Power and has done so for 10 years now - making him one of the most experienced installers in the Illawarra. - For more see About HONESTY: The Solar Power Pro tells it like it is.

How many kilowatts of solar can you install in Wollongong?

While in some areas network operators request you contact them first, that doesn't appear to be the situation in Wollongong. Wollongong households can install up to 4.99 kilowatts of rooftop solar if they have single phase power. The maximum is determined by both the size of the inverter and the total capacity of the solar panels.

Should you install solar panels in Wollongong?

Wollongong households and business can benefit from PV installations where the solar panels have a total capacity greater than that of their inverter. Although this will result in some loss of solar panel output on clear days when the sun is high in the sky, more output will be generated when the sun is low or skies are overcast.

Who is solar power pro installations?
