

How much does solar power cost in NSW?

Instead, individual electricity retailers assign a value to exported solar power as they see fit. It is a competitive market so electricity retailers do have an incentive to offer a reasonable feed-in tariff to win customers with solar panels installed. According to Energy NSW, the benchmark rate is 4.9 to 6.3 cents per kWh for 2024/2025 in NSW.

Who has the best solar feed-in tariff in NSW?

Origin Energy currently has the best solar feed-in tariff in NSW, where eligible customers on a single rate tariff can get 20 cents per kilowatt hour (c/kWh) for feeding electricity into the grid. AGL has the second highest feed-in tariff rates at 15c/kWh. Here are some of the cheapest solar-specific deals from the retailers on our database.

Is solar power a good option in NSW?

NSW has the right climate for solar to produce power most of the year so solar is a good and affordable option. Choosing the right feed-in tariff reduces your reliance on the grid and lets you use clean energy. It's a small thing that can save you money and the planet. **Why Is Solar Power Important?**

How do solar panels work in NSW?

When your solar panel system generates more power than you need, it feeds back into the grid and you get paid for it. These payments are added as credits on your bill and help reduce your electricity costs. Most NSW energy providers have single rate tariffs which charge the same rate all day.

How much does a solar boost cost in NSW?

Origin Energy offers the Solar Boost plan, a popular choice in NSW. It provides a feed-in tariff of 10 cents per kWh. For a typical daily export of 10 kWh, this means a \$30 monthly credit. The plan is flexible, with no lock-in contracts or exit fees, allowing you to switch if a better deal comes along.

Why should you buy a solar plan in NSW?

Solar is good for the environment and your power bill. During the day extra power can be sent back to the grid. In NSW this earns you feed-in tariffs which are added to your bill as credits. These credits can save you a lot of money. When buying a solar plan in NSW consider the upfront and the savings. Good feed-in tariffs and lower bills.

Household solar systems usually take between 5 and 10 years to pay for themselves. It depends on the cost and size of the system, where you live and how much electricity you use during the day. A 3 kilowatt solar system ...
