

What are solar rebates & incentives?

Rebates and incentives are a crucial way to encourage broader adoption of solar energy and full home electrification across the country. These incentives will typically come from your utility, state government, or the federal government in the form of tax credits, property tax abatements, one-time rebates, or performance-based rebates.

Can I get a rebate if I buy a solar system?

Several states offer rebate programs that cover some or all of the cost of purchasing a home solar system and/or battery storage. These rebates can work in addition with the federal tax credit to increase the savings of going solar. For example:

What is a solar rebate & tax credit?

Rebates -- A one-time incentive for solar installations offered by utilities and/or government agencies. Tax Credit -- A direct dollar-for-dollar deduction off of your income taxes that you would normally pay to the federal government. Tax Deduction -- Deduction of taxable income that can increase your refund or reduce how much tax you owe.

How do solar rebates work?

Sometimes solar rebates are given directly to the resident and other times they're given to the solar contractor who can then charge less for installations. Many utilities will offer additional rebates for solar energy storage systems or other energy efficiency upgrades.

Is the federal solar tax credit refundable?

In 2020 - 2021, the ITC was reduced to 26%. The Inflation Reduction Act of 2022 reinstated and renamed the program the Federal Solar Tax Credit (now known as the Clean Residential Energy Credit) and raised the credit back up to 30%. The Residential Clean Energy Credit is non-refundable.

Can a solar tax credit be combined with solar incentives?

Yes, the solar tax credit can be combined with solar incentives from your state, local government, or utility provider. For example, New York State also offers a 25% tax credit which can be used in addition to the 30% federal solar tax credit.
