

Can I get a rebate if I buy a solar system?

Several states offer rebate programs that cover some or all of the cost of purchasing a home solar system and/or battery storage. These rebates can work in addition with the federal tax credit to increase the savings of going solar. For example:

What are solar rebates & incentives?

Rebates and incentives are a crucial way to encourage broader adoption of solar energy and full home electrification across the country. These incentives will typically come from your utility, state government, or the federal government in the form of tax credits, property tax abatements, one-time rebates, or performance-based rebates.

What is a solar rebate & tax credit?

Rebates -- A one-time incentive for solar installations offered by utilities and/or government agencies. Tax Credit -- A direct dollar-for-dollar deduction off of your income taxes that you would normally pay to the federal government. Tax Deduction -- Deduction of taxable income that can increase your refund or reduce how much tax you owe.

What is a local solar rebate example?

Local solar rebate examples include: The city of Philadelphia created a solar rebate program in 2019 that offered rebates of \$0.20 per watt for residential projects. However, this program was suspended due to budget cuts related to COVID-19. PBIs are incentives based on the energy production of a solar system.

How does a solar rebate work?

You'll simply sign the installation contract, and your installer will subtract the rebate amount from your total cost. There are many different brands to choose from when it comes to solar panels, inverters, and batteries. To make their equipment stand out, some companies offer rebates or other promotions.

What is the federal solar tax credit?

The federal solar tax credit, also known as the solar investment tax credit (ITC), is a tax incentive that encourages homeowners to purchase a solar power system. With this credit, you can claim 30% of your total solar PV system cost as a tax credit.
