

How do ring solar panels work?

RING solar panels use the PV effect to convert sunlight into a usable energy source. The panels act as a trickle charger for the camera battery, increasing the battery life by about 1-2% each day, depending on the sun exposure.

Can I use the ring solar panel with a ring device?

When using the Ring solar panel with any supported Ring Device, you should always choose "Battery Mode." Ring solar panels only work with Ring devices that come with a battery. If a device has no battery, the Ring solar panel can't be used with it.

Does ring sell solar panels?

RING sells a solar panel that is guaranteed to be compatible with the device, but other panels will work as well and some may even work more efficiently. In this guide, we are going to look at the specifications for a RING brand solar panel and we already reviewed a few alternative panels for the device above.

Do ring solar panels work with a battery?

Ring solar panels only work with Ring devices that come with a battery. If a device has no battery, the Ring solar panel can't be used with it. When you choose the Wired mode during installation, the Ring app might treat the device as a wired device and, as such, not recognize the solar panel when it's connected.

How many watts is a ring solar panel?

The panel is rated for 5-watt power, over double that of the previous panels in this guide. It is a larger panel but comes with flexible mounting options. BigBlue, a reputable solar brand, offers a 5-watt panel that is compatible with both RING home security cameras.

Do I need a solar panel for each ring camera?

Yes! You do need one solar panel for each Ring camera. Solar panels and chargers are made to work with just one device at a time. So, if you want to use the solar option for multiple cameras, you'll need a separate solar panel or charger for each camera. Each camera needs its own sunny buddy to keep it charged and running.
