Is Shepparton a good place to live?

A sleepy and wonderful city in Victoria's north east, Shepparton has a proud history; first as a sheep station, then as a major railway town and finally as a major agricultural and manufacturing city. With a strong focus on agriculture and primary industry, the city of Shepparton already relies on its ample amounts of solar energy resources.

Who is Blake Campbell solar?

Blake Campbell Solar has partnered with only the most reputable and reliable manufacturers of Solar PV equipment. We only use TIER ONE brands that have 25-year panel warranties and companies that have a long track record in the industry over many years. What is solar pv? use in your home. "panels". Several of these panels are combined onto your roof.

How do solar panels work?

Solar panels convert sunlight into clean green DC electricity. If you generate more electricity than your household uses, the excess electricity goes back to the grid, adding a credit to your electricity bill. The inverter converts DC electricity into useable AC electricity. During peak periods and at night, electricity is imported from the grid.
