

What are South Australia solar rebates?

Various South Australia Solar Rebates are the following: The Federal Government Solar Rebate, also recognized as the Small-Scale Renewable Energy Scheme, is an initiative all across the nation. It encourages people, especially homeowners and small-scale businesses, to adopt household solar panels and other small-scale renewable energy systems.

Can I get a solar rebate if I live outside Adelaide?

Unfortunately, if you live outside the city of Adelaide, there are no solar rebates for your solar PV system. The South Australian Home Battery Scheme provides rebates for eligible homeowners to install a solar battery system, helping them store solar energy and reduce their reliance on grid electricity.

What are SA solar rebates & feed-in tariffs?

By taking advantage of these rebates and feed-in tariffs, homeowners and businesses across Adelaide and South Australia can significantly reduce upfront costs of solar system installation and the impacts of ongoing electricity bills. In this guide, we'll explore everything you need to know about SA solar rebates in 2024.

What is a STC rebate in South Australia?

The Federal STC rebate (which is technically an 'incentive' and not actually a government solar 'rebate') South Australians living in zone 3 can expect each year. The number of STCs rewarded reduces every year, so get in quick! Jump to our Australian Solar Rebates and Incentives page for more information on STCs and solar rebates in SA.

How does a 5kw solar PV rebate work in South Australia?

Going by the zoning maps, most of South Australia is under zone 3, which attracts a 1.382 STC rating. Now, with this zone rating in mind, a 5Kw solar PV system rebate bought this year (2025) in SA could be calculated as follows: $5 \times 11 \times 1.382$, which would entitle you to about 76 tradable small-scale technology certificates.

How much STC solar rebates do you get in SA?

While the amount of rebate one gets varies based on the system they purchase, you should expect to get at least \$4000 in STC solar rebates in SA for an average solar installation. An average solar system, in this case, is one with at least 5Kw rated nominal output with about 20 solar panels.
