

Are solar panels worth it in South Carolina?

Solar panels can be worth it in South Carolina due to the massive rebate programs. With a 5 kW system, you can save approximately \$25,056 over 20 years on electricity costs if you pay for the system in cash.

How much does solar cost in South Carolina?

Prices range from \$26,350 to \$35,650, but after the federal tax credit, that drops by 30%. While this may sound high, South Carolina has tremendous local incentive programs that bring down the cost of solar. That's why over 13,000 South Carolina homeowners have used EnergySage to receive and compare quotes for solar installations.

Are solar incentives a good idea in South Carolina?

Solar incentives and rebates can cut the cost of installing solar in South Carolina by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage.

Should you go solar in South Carolina?

While most solar companies include installation and labor in the overall price, it's a good idea to double-check. If you want to save money on your solar setup, the federal solar investment tax credit (ITC) is your best bet for going solar in South Carolina.
