Why should you go solar in Seattle?

In Seattle, you can reduce your carbon footprint by 10 pounds a year with solar panels. As you can see, going solar has so many other perks outside of saving money. One of the primary ones is that you can help save the Earth too. Which solar power company is the best in Seattle?

Should you switch to solar power in Seattle?

The amount of sunlight your home gets: Due to Seattle's relatively low amount of average daily sunlight, you might not see as many savings on your electricity bills. Typical energy usage: The more electricity your household consumes on average and the steeper your current power bills are, the more benefits you'll see from switching to solar.

How much does solar cost in Seattle?

The average price of solar is about \$2.22 to \$3.32 per watt in Seattle, so anything in that range is a fair price. Some prices may be too good to be true. If your installer quotes you way below the average price in your area, proceed with caution. Installers must charge fair prices to remain in business and provide you with 25 years of support.
