Is solar energy a good option for your Mississippi home?

During the past decade, deployment of solar energy systems in the United States (U.S.) has grown rapidly. Cost reductions as well as new home-ownership and financing options have made solar energy a possibility for many Mississippi residents. Adding a solar power system to your property is a big decision.

Do solar panels work in Mississippi?

Though solar systems can generate substantial energy for homeowners in Mississippi,each household will have specific needs and considerations that affect which panels will work best for them. Your home's roof condition,curb appeal,energy consumption,and budget all play a role in your clean energy needs and capabilities.

Does Mississippi have a solar system?

According to the U.S. Department of Energy, Mississippi's residential electricity rates increased, on average, by 1.47 percent annually between 2006 and 2016. Some installers will include a guarantee of savings or the amount of energy expected to be produced by a solar system.

What percentage of Mississippi's electricity comes from solar?

Currently,0.68% of Mississippi's electricity comes from solar energy,*which is enough to power 34,294 households. Mississippi got its first solar power facilities in 2017,but its clean energy production had tripled by 2020. What are the advantages of going solar in Mississippi?

How much does a 6 kW solar system cost in Mississippi?

A 6 kW solar system will cost about \$15,840in Mississippi before incentives. After the 30% federal solar tax credit, this drops to \$11,088, or about \$1.85 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed and how you finance it.

Who is a qualified solar installer in Mississippi?

According to Mississippi Power,a qualified solar installer in Mississippi should be certified by the North American Board of Certified Energy Practitioners (NABCEP). NABCEP is an organization that trains and certifies renewable energy professionals. The Mississippi Distributed Generation Rule also provides guidance on finding qualified installers.
