

What is a solar panel tax credit?

The solar panel tax credit -- or Residential Clean Energy Credit-- allows you to recoup a portion of the money you spent on energy-efficient improvements. This federal tax credit is available for both homeowners and renters. The Residential Clean Energy Credit was created to encourage taxpayers to invest in clean energy.

Can you get a solar tax credit?

The U.S. government offers a solar tax credit that can help you recoup up to 30% of the cost of installing a solar power system. The residential clean energy credit also covers other types of renewable energy projects undertaken by homeowners, subject to certain guidelines. To claim the solar tax credit, you'll have to fill out IRS Form 5695.

Is the federal solar tax credit refundable?

In 2020 - 2021, the ITC was reduced to 26%. The Inflation Reduction Act of 2022 reinstated and renamed the program the Federal Solar Tax Credit (now known as the Clean Residential Energy Credit) and raised the credit back up to 30%. The Residential Clean Energy Credit is non-refundable.

What is the federal solar investment tax credit?

The Federal Solar Investment Tax Credit is a government program that can save US taxpayers 30% of the total purchase and installation costs of new, eligible clean energy property for their primary or secondary homes. Officially called the Residential Clean Energy Credit, it is also frequently known by other names, including:
