

How does the sun tax affect solar panels?

The sun tax will effect anyone with solar panels that exports solar energy to the electricity grid. Various factors,such as feed-in tariff,battery storage,energy provider and electricity plan,will change how much the sun tax impacts individual solar users.

What is the sun tax?

The sun tax is a two-way rooftop solar tariff taxing Aussies for exporting solar energy to the grid when it is overloaded,encouraging self-consumption first before exporting it for a bill credit. The cost of the sun tax is yet to be determined,but NSW and ACT have proposed how much they may impact homes and businesses.

What is the solar tax & how does it affect Australia?

With 30% of Australian homes now equipped with solar power, the electricity grid has an oversupply of solar energy. The sun tax has been introduced to encourage solar users to either use their solar power instead of exporting it to a struggling grid, or to invest in solar batteries to store energy for later use. Who will be impacted by the sun tax?

What is a solar tax export tariff?

The sun tax export tariff was proposed as a way to prevent further gridlock on electricity networks. It's believed that supply disruptions will lessen as households will be encouraged to use their own solar energy first,rather than sending it back into the grid for a bill credit.

What is a solar power tax & how does it work?

The tax was developed to reduce congestion in the electricity network,which is grappling to handle the influx of power being sent to the grid at times of high demand. It's a move that is making solar customers like Markus consider giving away their excess power before they're charged for it.

How much does a solar tax cost in NSW?

This includes \$13.30 a year in charges,offset by \$6.70 of export rebate ( $\$13.30 - \$6.70 = \$6.60$ ). Endeavour Energy,another electricity distributor in NSW will be introducing the solar tax from 1 July 2025,in an effort to improve fairness for customers using its network to use and export solar energy.
