Solar power to go

Is solar energy the way to go?

When you make the decision to transform the way that you access to power and the kind of electricity that you choose to have,you will find that solar energy is the way to go. Solar panels are the devices used to convert light from the sun into energy which can be used to power homes and businesses in Midrand.

How can I go solar?

To go solar,contact us for an initial solar consultation. Schedule a home site survey for a personalized analysis. Our team will manage the design and regulatory approval of your system. After installation and energizing of your new system,you'll be thinking and living green.

Who is go solar?

Go Solar was the first company to respond. Peter Bell was very knowledgeable and efficient, friendly and nothing was a problem. His crew of installers arrived on time and the work was carried out faultlessly, including running the wiring out of sight and placed the inverter where we wanted it.

Are portable solar panels a good option?

Portable solar panels offer a convenient and eco-friendly way to harness the power of the sun, making them an attractive option for outdoor enthusiasts, travelers, and those seeking off-grid energy solutions.

What are the best ways to use portable solar panels?

Portable solar panels offer versatile and eco-friendly solutions for various energy needs. Here are some of the best ways to use portable solar panels: Portable solar panels are ideal for RV and camping trips. They provide a reliable source of power to charge batteries,run small appliances,and keep devices like phones and tablets powered up.

How do portable solar panels work?

To ensure efficient energy conversion,portable solar panels often include a charge controller. This device regulates the voltage and current going into the battery,preventing overcharging. Some models also have integrated inverters that change DC to alternating current (AC),making it possible to power household appliances.
