

What are solar tonneau covers?

Solar tonneau covers are a type of cover for pickup truck beds that generate electricity from sunlight. They aren't an entirely new idea, as Via Motors has offered them in the past, with outputs of up to 800 watts, enabling up to 10 miles of range in extended-range electric trucks.

What is the maximum output of solar tonneau covers?

Solar tonneau covers aren't an entirely new idea. Via Motors has offered them in the past, with outputs of up to 800 watts, enabling up to 10 miles of range in those extended-range electric trucks.

Does Workspport offer a solar tonneau cover?

Workspport has partnered with an electric pickup truck maker to offer its solar tonneau system as a built-in feature for every one of the automaker's electric trucks. The agreement is expected to generate \$70 million in revenue for Workspport.

What is a tonneau cover?

A tonneau cover is a cover for the bed of a pickup truck. The system developed by Workspport allows incremental bed access, meaning that the four panels are hinged to permit a progressively wider opening as needed.

Did Tesla tease a tonneau cover with solar panels?

Before anyone says the T-word, yes it is the case that Tesla teased a tonneau cover with solar panels for its Cybertruck pickup, back in 2021. A little farther back in time, though, the Canadian company Workspport had already sniffed out the idea of a PV makeover for tonneau covers.

Can a solar tonneau be used in a pickup truck?

The body of a passenger car poses a number of challenges, including accident risk, he noted. Pickup trucks face some of the same issues, but to a lesser extent due to the availability of a flat surface: "A solar tonneau... can be removable, allowing you to collect sunlight elsewhere when that's useful.
