

What is a solar tube & how does it work?

Solar tubes are light sources placed in key points of your house with the single goal of providing a strong source of natural light. One side of the tube has direct exposure to natural light from outside, while the other end projects the light into your home. The tube has a reflective surface that redirects light from the outside to the inside. 1.

What is solar tube lighting?

Luckily, there's also solar tube lighting. Solar tubes have risen quite a lot in popularity in recent years because they offer free natural light from the sun directly into your house. The best part is that they are powered by sustainable energy (the sun), which makes their energy free. What Is a Solar Tube?

Do you need solar tube lighting?

Having access to natural light in your house is very desirable, but it can be difficult unless you are blessed with massive windows. Luckily, there's also solar tube lighting. Solar tubes have risen quite a lot in popularity in recent years because they offer free natural light from the sun directly into your house.

What are solar tubes used for?

Solar tubes are already used to light plenty of buildings such as the University of Stockholm, Kastrup Airport, and The University of Arizona, even in one Berlin Metro Station. They were even once used to light the entire Handball arena in the London 2012 Olympics.

Do solar tubes provide natural daylight?

Solar tubes can still provide natural daylight on cloudy or rainy days, although the amount of light will be reduced. Some models are designed to capture and transmit diffused light, which can help to increase the amount of light available in these conditions.

How much does a solar tube cost?

Below is a brief overview of solar tubes that can help you determine if solar-tube technology is right for your home. Solar tubes bring natural light into homes while keeping excess heat out. The total cost of a solar tube is between \$650 and \$2,150 with installation, and some models are eligible for tax credits.
