What is solar Washington?

Quick links: Solar Washington is the nonprofit organization connecting you with "all things solar" in Washington. We present and partner with other organizations to hold events and our annual Washington State Solar Summit, host Solar 101 workshops, and provide other educational resources for Washingtonians with an interest in solar.

Can you get solar power in WA?

With the advent Made-in-WA solar components and a production incentive rate paid to WA property-owners who install grid-tied solar, the numbers of homes with new solar systems in our state has skyrocketed. Click the above graphic to view larger file. You too can get clean renewable solar electricity to meet a portion of your annual energy needs.

Are solar panels worth it in Washington?

Solar panels are considered more valuable where they can offset high energy prices or high energy consumption. The electricity rates in Washington are the second-lowest in the nation, and the energy usage is not that far above average. As such, solar panels aren't as valuable in Washington as they are in most other states.

How much does a 5 kW solar system cost in Washington?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system qualifies for this incentive, including equipment, labor, permitting, and sales tax. The average cost for a 5 kW solar panel system is around \$13,601 in Washington.

Is solar a good option in Washington State?

Washington is well-known for its cloudy weather and above-average rainfall. Cloudy days can reduce your solar energy production by up to around 90%, but the state still experiences enough sunlight to make solar a good option for most homeowners.
