

Do solar panels have a warranty?

Any reputable solar panel manufacturer will offer two warranties: a product warranty and a performance warranty. These cover manufacturing faults and guarantee a certain level of performance for your panels. Product and performance are the two basic warranties to watch when researching solar panel brands to invest in.

What is a solar panel performance warranty?

A solar panel performance warranty guarantees that a home solar panel installation will meet or exceed a baseline of electric power output over the panels' lifetime and warranty period.

How do I get a solar panel warranty?

Generally, the most robust warranties are obtained by hiring installation companies certified by the solar brands they represent. Alternatively, long warranties can also be secured from solar manufacturers that provide their own installation services. What Is Not Covered by a Solar Panel Warranty?

What are the different types of solar warranty?

There are two main types of solar warranties: performance warranty and product warranty. A performance warranty is a guarantee that the total system output will not drop below a specified degradation percentage. A product warranty guarantees the solar panel's capability to produce energy, and it's also known as a lifespan warranty.

How long do solar panel warranties last?

While the industry standard is 25 years, some manufacturers now offer warranties up to 30 or even 40 years. For example, Silfab offers a 30-year warranty, and Maxeon provides a 40-year power warranty.

Does a solar panel warranty cover labor costs?

Solar panel warranties typically do not reimburse for labor costs associated with installing new equipment or shipping fees for new equipment. When comparing warranties, focus on product warranty terms, power guarantees, labor warranty terms, transferability and bankability, and the availability of an extended warranty.
