

How long do solar panels last in Washington State?

Most home solar systems provide energy savings that eventually add up to more than the total system expense, which means your panels are expected to pay for themselves over time. The average solar panel payback period in Washington State is around 16 years, as compared to the average of 12 years throughout the rest of the country.

Are solar panels worth it in Washington?

Solar panels are considered more valuable where they can offset high energy prices or high energy consumption. The electricity rates in Washington are the second-lowest in the nation, and the energy usage is not that far above average. As such, solar panels aren't as valuable in Washington as they are in most other states.

What is solar Washington?

Quick links: Solar Washington is the nonprofit organization connecting you with "all things solar" in Washington. We present and partner with other organizations to hold events and our annual Washington State Solar Summit, host Solar 101 workshops, and provide other educational resources for Washingtonians with an interest in solar.

Should you switch to solar energy in Washington State?

Switching to solar energy in Washington State may come with several benefits, including tax breaks. Plus, it's more eco-friendly. Here's everything you need to know. Instantly estimate your solar cost and savings. Harnessing the energy of the sun to power your home is a great way to cut down on your eco-footprint.

Is Washington a good place to go solar?

Washington is a great place to go solar because there are several solar incentives available that make solar panels more valuable. One of the most appealing incentives is the federal solar tax credit (ITC). The ITC is a credit to your federal income taxes, and it totals a massive 26% of your entire installation expense.

Can you get a loan for solar panels in Washington State?

If you're planning on financing your solar panels, a couple of loan programs in the state can help make it more affordable. One offering is the Washington State Housing Finance Commission's EnergySpark Home Loan. Customers buying a home can apply for an EnergySpark mortgage with a reduced interest rate.

The Washington Renewable Energy System Incentive Program (RESIP) allowed residential-scale solar panel systems to earn \$0.16 per kWh of energy generated, up to \$5,000 per year.
