

Are solar panels really free?

No, solar panels are not free. Advertisers claiming to offer free solar panels typically provide a solar lease or power purchase agreement (PPA). In these arrangements, a company installs solar panels on your house for no upfront cost and charges you a monthly rate for the power they generate.

Should you install free solar panels on your property?

Installing "free" solar panels on your property comes with multiple nuances. While you may not incur upfront costs, you will still have to pay later. Here's how it works. Solar power is something everyone on the planet gets for free. However, the process of turning it into usable energy is expensive.

Are there free solar panels for low-income people?

With all that said, there are a handful of very niche state-run solar panels that provide eligible low-income households with solar systems at no cost. The top results after searching "free solar panels" on YouTube. Top: An ad for a "free government solar program" likely designed to collect personal information or sell solar leases.

Are free solar panels a scam?

Many other "free" or "no-cost" solar programs are outright scams. Tax credits and other incentives can reduce the upfront costs of going solar without committing you to unfavorable terms -- just make sure they're legitimate. Can you get free solar panels?

What is a free solar panel offer?

A "free solar panel" offer doesn't mean you will get solar panels for free. Instead, this usually refers to an agreement that allows you to start using solar panels without incurring upfront costs. However, you will have to make payments in the future.

Are 'free solar' claims legitimate?

In reality, 'free solar' claims are often used to sell solar leases and power purchase agreements (PPAs), which benefit the installer more than the homeowner. These leases and PPAs were popular when solar panel costs were much higher. However, leasing solar panels does not make them free.
