

Do I need a vent on my Conex shipping container?

Yes, you will need intake vents down low for fresh air to enter your Conex shipping container. This allows hot air to rise and exhaust out of the vent on your container's roof. Our Solar RoofBlaster is designed with a larger, more powerful fan and a 5W solar panel for efficient ventilation.

Where should a shipping container vent be installed?

To create an effective ventilation system, install intake vents near the floor of your shipping container. This allows cool air to enter and push hot air out through exhaust vents at the top.

What is a big air 400 CFM solar powered roof vent?

The BIG AIR 400 CFM Solar Powered Roof Vent is engineered to be installed on the roof of shipping containers. The vent comes with a 11 7/8 x 14 11/32 range hood filter (Bug Screen) In order to exhaust the full 400 CFM, 2 Big Air 45 Vents are required for air intake. As an Amazon Associate, we earn from qualifying purchases.

What is a shipping container vent Kit?

The shipping container vent kit by CON-VENTS is an effective product for preventing moisture from building up. It comes with two vents that are designed to each end for cross ventilation. This product itself is designed to cover a 20 feet container. It can be placed anywhere, such as the side doors or windows.

Do shipping containers have ventilation holes?

Most shipping containers will have built-in holes to act as ventilation. But the problem is that these holes aren't enough for this situation. It's best to install a ventilation system such as having intake vents, louver vents, or even a window.

How many vents should a steel shipping container have?

To prevent rust and moisture damage to your equipment inside a steel shipping container, you need 1-2 vents for every 20' of container. Uniform air movement throughout the entire container is important.
