

What is a cordless Lunchbox?

It's a cordless lunchbox with a built-in power bank that can self-charge using the solar panels on the lid. And though it comes with solar panels, it's compact and is perfect for carrying to work, a picnic, or while traveling on a flight.

Does Sunnyside Lunchbox need to be plugged in?

Thanks to its solar panels, SunnySide lunchbox does not need to stay plugged in. With its cordless functionality, you can eat a hot or cold meal anytime, anywhere. With a single charge, your food stays fresh for up to 20 hours and can be heated up to 7 times.

Is Sunnyside a self-heating Lunchbox?

Unlike most self-heating lunchboxes on the market, SunnySide does not require to be plugged in to heat your food or keep it at the perfect temperature. It's a cordless lunchbox with a built-in power bank that can self-charge using the solar panels on the lid.

How does Sunnyside Lunchbox work?

With SunnySide lunchbox, you can ditch microwaves forever. Microwaves heat food by causing water molecules to resonate at high frequencies, which changes the chemical structure of the food causing the food to dry out. You deserve better than the dreaded taste of that "warmed-over-flavor".

One startup from Texas called SunnySide has created a lunchbox that uses solar power to heat food. SunnySide is a modern take on the lunchbox that aims to keep your food fresh with its multiple...

SunnySide comes with a built in solar panel and power bank to keep your food fresh for up to 20 hours, heat up your food, and charge your phone all from your lunchbox!
