

Solar powered vent fan for shipping container

What is a big air 400 CFM solar powered roof vent?

The BIG AIR 400 CFM Solar Powered Roof Vent is engineered to be installed on the roof of shipping containers. The vent comes with a 11 7/8 x 14 11/32 range hood filter (Bug Screen) In order to exhaust the full 400 CFM, 2 Big Air 45 Vents are required for air intake. As an Amazon Associate, we earn from qualifying purchases.

Do I need a vent on my Conex shipping container?

Yes, you will need intake vents down low for fresh air to enter your Conex shipping container. This allows hot air to rise and exhaust out of the vent on your container's roof. Our Solar RoofBlaster is designed with a larger, more powerful fan and a 5W solar panel for efficient ventilation.

What is a solar powered exhaust fan kit?

With our Solar Powered Exhaust Fan Kit, you can effectively improve ventilation and control the temperature inside your shipping container. By removing excess heat and moisture, this kit helps prevent damage to your stored items and creates a more comfortable and functional space. Don't miss out on the benefits of our Solar Powered Exhaust Fan Kit.

Where should a shipping container vent be installed?

To create an effective ventilation system, install intake vents near the floor of your shipping container. This allows cool air to enter and push hot air out through exhaust vents at the top.

What size is the fan in the new ventilation solution?

We have designed a new ventilation solution for Conex shipping containers that is built in the same vent but has a larger, more powerful fan (120mm; 96cfm) and 5W solar panel.

How do I install a solar powered exhaust fan kit?

Installing the Solar Powered Exhaust Fan Kit is straightforward. A hole needs to be drilled on the roof of the container, and a square hole must be cut in the side of the container. The kit provides a template for precise hole placement.

This solar-powered fan vent helps remove hot, moist air faster than a passive vent alone. Promotes uniform air movement throughout the vented space, which helps minimize mold/mildew growth. Moving air also helps prevent moist wood that can lead to rot, rust, and pest infestations. ... Introducing our specialized solar-powered vent for shipping ...
