

Is the sole SR400 a good rower?

It makes sense that the Sole SR400 rower has wound up discontinued fairly quickly. It is incredibly close in spec to the SR500, with the same amount and type of resistance, and the same number of built-in programs. Its frame design is slightly different, without the ability to fold up for storage.

Are SR400 rowers on clearance?

If you've come across an SR400 for sale--possibly on clearance at a fitness equipment outlet, or as a used item, read on for more information. The Sole SR400 Rower is a compact and more inexpensive version of their SR500 rower.

What is the difference between SR500 and SR400 rowers?

The Sole SR400 Rower is a compact and more inexpensive version of their SR500 rower. The SR400 uses both air and magnetic resistance that generates a smooth, natural pull to create a realistic "on the water" sensation. There are 16 levels of resistance to choose from.

Does SR400 have a chest strap?

Heart rate monitoring: The SR400 is equipped for wireless heart rate monitoring, but it does not come with a chest strap. The Sole SR400 makes for an excellent indoor rower with its friction-free resistance system and wireless adjustment resistance.

Which is better SR400 or SR500?

Price: The SR400 is hundreds of dollars cheaper than the SR500, and it's really very affordable in general at just \$699.99. Smooth operation: This model creates a smooth, natural pull using a combination of eddy current magnetic resistance and wind resistance. Magnetic force is used at the higher resistance levels to keep noise to a minimum.
