

Are solid dish soap bars a zero waste product?

Solid dish soap bars don't require any packaging, making them about as close as you can get to being a zero waste product. While nothing is truly zero waste, using solid dish soap bars significantly reduces the amount of waste we create and is more economic in the long run.

What is zero waste dish soap?

Clean freaks rejoice, zero waste dish soap is one of the easiest zero waste swaps you can make. These sustainable dish soaps provide an escape from the dreaded plastic bottle, and they keep our drainpipes and waterways cleaner, too. Who wants to eat off a plate washed with nasty surfactants, sulfates, and other synthetics, anyway?

Is solid dish soap environmentally friendly?

Solid dish soap is eco-friendly. It's also about as close to zero waste as you can get for a dishwashing soap, which is important considering how much plastic pollutes our environment on a daily basis. It also saves money.

What can you use instead of liquid soap in a dispenser?

Instead of filling the soap dispenser with liquid soap, you can use a solid dish soap bar. This bubble up dish soap dispenser and brush set pairs perfectly with solid dish soap bars.

How do I make my dish soap eco-friendly?

Store any excess in your spare jar. Shake the dispenser gently before each use to ensure consistent texture. In addition to making your dish soap sustainable itself, you can eco-fy your entire eco-friendly dishwashing routine. Of course, what good is zero waste soap if you don't have a zero waste scrubber/bag to go with it?

What makes solid dish soap bars more economic?

While nothing is truly zero waste, solid dish soap bars significantly reduce the amount of waste we create and are more economic to use in the long run. They don't require any packaging, making them about as close as you can get to being a zero waste product.
