

Why did solid power shares pop today?

Solid Power shares popped today after fellow solid-state battery maker QuantumScape (QS -1.74%) announced some game-changing news. As of 2:45 p.m. ET, Solid Power shares were higher by 11.2%. That move was dwarfed, however, by the 47% spike in QuantumScape shares at that time.

Does solid power have a long-term solution?

But battery maker Solid Power (SLDP -2.60%) is one of several companies that hopes to have a long-term solution. Solid Power shares popped today after fellow solid-state battery maker QuantumScape (QS -1.74%) announced some game-changing news. As of 2:45 p.m. ET, Solid Power shares were higher by 11.2%.

Is solid power a good battery maker?

One reason is the lack of charging infrastructure. But battery maker Solid Power (SLDP -2.60%) is one of several companies that hopes to have a long-term solution. Solid Power shares popped today after fellow solid-state battery maker QuantumScape (QS -1.74%) announced some game-changing news.

Does solid power have a 22-layer ASSB?

That's the beauty of competition. Comment! Solid Power is now producing a 22-layer ASSB (all-solid-state battery) with 330 Wh/kg and 20 Ah, and it intends to enter automotive validation in 2022.

Is solid power a good battery?

Solid Power's would be 50 percent better. If Solid Power uses lithium metal as the anode and NMC 811 as the cathode, the energy density increases to 440 Wh/kg. That's 69 percent better than the best cell currently available in the market, but it is also far from what Solid Power can achieve.

Which SSB battery is better - solid power or solid power?

The company's battery also promises a higher energy density (above 350 Wh/kg) and presented a good performance at -30°C. Solid Power states its battery operates well at -10°C but did not mention lower temperatures. Another element that allows us to compare both SSBs is fast charging.

There's a Korean investor on the SLDP subreddit who is watching SLDP closely. He posts a lot of interesting stuff about sulfides. Also you can see in note 11 to the recent 10K that solid...

Solid Power is now producing a 22-layer ASSB (all-solid-state battery) with 330 Wh/kg and 20 Ah, and it intends to enter automotive validation in 2022.

Summary. I believe Solid Power's share price will likely drop to "pre-hype" levels, approaching \$1.00 over the next six months due to weak near-term catalysts and price action trends.
