

What is SK Innovation's Partnership with solid power?

SK Innovation today announced a partnership with Solid Power, an industry-leading developer of all-solid-state battery cells, to develop all-solid-state batteries under a memorandum of understanding ("MoU") and joint development agreement ("JDA") on Oct. 28, 2021.

Will SK Innovation buy solid power?

SK Innovation also commits to make a USD 30 million (approximately, KRW 35.325 billion) investment to acquire a stake in Solid Power. Solid Power is known as a leading developer of all-solid-state batteries.

How will solid power and SK On work together?

The deepened relationship between the two companies will increase overall collaboration and development efforts on Solid Power's solid-state cell technology. The agreements enable SK On to use Solid Power's cell technology for research and development and to produce batteries on a new SK On solid-state line in Korea.

Will solid power supply SK Innovation electrolyte?

Solid Power plans to supply SK Innovation with its proprietary electrolyte for use in the manufacturing of all-solid-state cells. Under terms of the JDA, Solid Power expects to generate a small amount of revenue from both research and development and from the sale of electrolyte samples beginning in 2022.

Who backed solid power?

Solid Power is already backed by Ford and BMW. SK Innovation and Solid Power announced today a partnership to develop all-solid-state batteries under a memorandum of understanding and joint development agreement.

Who makes solid power batteries?

Solid Power is known as a leading developer of all-solid-state batteries. Besides SK Innovation, many global major automobile companies, including Ford and BMW, have acknowledged Solid Power's all-solid-state cell development and production technology and already invested in the company.
