

What happened to the shares of Solid Power?

Since the end of last Friday's trading session, shares of Solid Power plummeted 28.6% as of the market's close on Friday. On Tuesday, investors learned that Douglas Campbell, Solid Power's CEO, is retiring, thus leaving his position at the company's helm, effective immediately.

Is solid power (SLDP) a good stock to buy?

Solid Power (SLDP -2.21%) was hardly looking like a powerful stock on Monday. The solid-state battery developer's price fell by nearly 10% on news of a departure from the company's C-suite. That decline stood in marked contrast to the performance of the S&P 500 index, which crept 0.1% higher on the day.

Why did solid power stock sell off Tuesday?

In the regulatory filing, Solid Power did not provide the reason (or reasons) for Johnson's move. It also did not address the matter of a successor, which is likely one reason for the Tuesday stock sell-off. Investors might have overreacted a bit, as any company is more than just one manager or management team.

Will solid power stock end 2024 on a sour note?

Poised to end 2024 on a sour note, shares of Solid Power (SLDP 1.80%) are skidding today as investors seem energized about moving the solid-state battery stock out of their portfolios. The irony though is that the company hasn't reported any negative news which would be a catalyst for the sell-off.

What happened to Solid Power?

After Solid Power announced changes to its executive team, Wall Street responded with a downgrade of the stock from buy to neutral by D.A. Davidson analyst Michael Shlisky. The price target was also reduced to \$5 from \$13.

Is solid power a good stock to buy today?

Solid Power is still in the developmental phase and has not commercialized its product yet. Consequently, the stock's sell-off today is not based on anything material to the company. For those interested in powering their portfolios with Solid Power, today's sell-off provides a great opportunity.

Solid Power, Inc. develops solid state battery technologies for the electric vehicles (EV) and other markets in the United States. The company sells its sulfide-based solid electrolyte; and licenses its solid-state cell designs and manufacturing processes. It also produces and sells 0.2, 2, 20 ampere-hour (Ah), and EV cells.
