What does a number on a plastic container mean?

A triangle with a number inside (1 to 7) stamped on a plastic container or bottle is called a Plastic Identification Code- and doesn't necessarily mean that the item is recyclable. Unfortunately, it's not uncommon for people to throw rubbish in their recycling bin just because they see this symbol.

What symbol indicates that a plastic container is easily recyclable?

The symbol for this type of plastic is three arrows forming a triangle, with the number 1 in the center. When you see this symbol, you can know that the container can be easily recycled. It is the most common plastic used for disposable containers because it is easy to recycle and has very low production costs.

What does a plastic recycling symbol mean?

The series of recycling symbols on plastic items--a triangle with a number from 1 to 7 inside--can often tell you which kind of plastic the item is made of and how recyclable it is. The symbols--then collectively called the Resin Identification Code(RIC)--were developed in 1988 by the organization now known as the Plastics Industry Association.

What is the recycling symbol for PS plastic?

The recycling symbol for PS plastic is three arrows in the shape of a triangle with the number 6 in the center.
