What is Strata Solar's Megapack project?

Strata led the development of the Tesla Megapack-powered project that will bring critical energy storage capacity to the area, as well as jobs and taxes. Strata Solar estimates that more than \$3 million in new sales and use taxes and more than \$9 million in new property taxes will be generated by the project.

Is Strata Solar off-the-grid?

Solar power for Strata buildings at Arc Renewables is not an off-the-grid solution. Units will likely still need to draw some power from traditional energy suppliers. However, the system is bought by the Owners Corporation or Body Corporate, eliminating the need for dividing the roof up.

Can a strata community be powered by solar?

Yes, a strata community can be powered by solar in two main forms: a single solar system for the common area or multiple smaller systems for individual apartments. The choice depends on the building's size and energy usage demands.

Can I install a solar energy system at my strata property?

Strata management services could improve the value and enjoyment of your jointly-owned property. It is possible to install a solar energy system at your strata property. Read about the considerations and approval process for solar installation.
