

What is a SunPower solar panel?

SunPower's panels are constructed with top-grade, light-weight polymer materials, allowing the for easy transport, installation and panel flexing up to 30 degrees. Made with SunPower's highest power Gen II back contact cells, SunPower's flexible panels deliver the highest power output and the highest charging capacity in their product class.

Why should you choose SunPower flexible panels?

Flexible panels made with SunPower cells are resistant to power loss via cracking and corrosion,unlike conventional cells,which are much more likely to lose power when bent or subjected to a moist environment. SunPower flexible panels are the #1 choice for customers due of the combination of high power and cell ruggedness.

What are SunPower solar panels made of?

SunPower's panels are constructed with top-grade,light-weight polymer materials,allowing the for easy transport,installation and panel flexing up to 30 degrees. The SunPower Maxeon™ Solar Cell is the only cell built on a solid copper foundation.

What makes SunPower's semi flexible solar panel easy to set up?

SunPower's semi flexible solar panel comes with quick-connect cables that make them easy to set up,even for newbies without experience in solar panels. For those buying flexible panels for the first time and who want to avoid getting a bogus item,don't fret. SunPower offers a product warranty for up to two years.

What are SunPower branded panels?
