

How much does a SunPower solar system cost?

Since SunPower solar systems are more expensive than most, you stand to save more on a system with SunPower than you would from most other providers. The average ITC value when you go solar with SunPower is around \$10,800, whereas the average value from other providers would be \$8,991.

How much does a solar system cost?

The average solar panel system from Sunpower is 7,870 watts (7.9 kW) and costs \$36,300 for a price per watt of \$4.60. The expected cost per kilowatt hour (kWh) is \$0.17. Most of the systems sold by Sunpower use their lease or power purchase agreement (PPA). For these financed PV systems, the lifetime price per watt is \$5.60.

How much does SunPower cost per watt?

SunPower is more expensive than most other solar installers, with per-watt pricing averaging approximately \$4.00. For comparison, the average cost of solar equipment in the U.S. is \$3.33 per watt.

Are SunPower solar panels worth the money?

Cost (20%): The cost is the only area where SunPower is really lacking. The panels come with some of the highest prices per watt in the industry of \$3.30 on average. This is far higher than the industry average of \$2.66, so the company loses quite a lot of points here. Still, the overall value is outstanding and worth the money, in our opinion.

Can you buy solar panels from SunPower?

You can buy panels from SunPower, but you can no longer lease them or enter into a power purchase agreement if you don't have the capital to commit to a solar panel system purchase. If you decide to work with SunPower, you'll get the best panels on the market by several metrics. What equipment does SunPower install?

How efficient are SunPower solar panels?

The efficiency of your SunPower solar panels will vary depending on the specific model you choose for your system. SunPower panel efficiency ranges from 21.7% to 22.8% (excluding the U Series), making them some of the most efficient solar panels currently available.

How much do solar panels cost in 2025? Updated 3/6/2025. Over the last ten years, the cost of installing solar panels has decreased by over 40% 1, fueling growth across new markets and deploying thousands of systems ...
