

Does SunPower still design solar panels?

SunPower no longer manufactures its own solar panels, but it still designs three lines of residential solar panels: SunPower Maxeon (M-Series), SunPower Performance (P-Series), and the U-Series. Maxeon Solar Technologies, SunPower's former manufacturing arm, produces the Maxeon and Performance panels.

What is the price per watt for SunPower solar panels?

At the heart of its operations is its cell technology, which is the most efficient on the market. At \$3.61 per watt, SunPower is not for budget shoppers. From solar panels to hardware, SunPower sells complete solar energy systems for residential and commercial applications.

Is SunPower a good solar company?

With nearly 40 years of experience and expertise, SunPower is the top-rated solar company in the U.S. They are the only residential solar company that's been around longer than their industry-leading, 25-year panel warranty. \*Based on the top 20 panel manufacturers by market share in the U.S. (per Wood Mackenzie US PV Leaderboard Q3 2022 report)

Why should you choose SunPower solar panels?

SunPower has been the leader in global solar innovation. Their solar panels are designed to withstand extreme conditions, such as temperature swings, battering winds, humidity, hail, and more. When you buy SunPower solar panels, you get the highest level of reliability and service.

Do SunPower solar panels come with microinverters?

SunPower solar panels come with built-in microinverters as part of the SunPower Equinox Home Solar System. This system also includes all necessary hardware and integrates well with other SunPower products, like the SunVault solar battery.

What is the advantage of buying the whole SunPower system?

The advantage of purchasing your whole system from one company is its integration with other products, like the SunVault solar battery. SunPower solar panels conveniently come with built-in microinverters and all necessary hardware through the SunPower Equinox Home Solar System.
