

How do I add a Sungrow inverter to isolarcloud?

In the iSolarCloud app, navigate to the device setup section. You can add your Sungrow inverter by scanning the inverter's serial number or QR code. The app will walk you through the process of registering the inverter for online monitoring. Once added, you'll be able to monitor your solar system in real time through the app.

What is Sungrow solar monitoring app?

Sungrow provides a solar monitoring APP for distributors/installers, end users, and O&M personnel to manage the PV power plant centrally.

Should I monitor my Sungrow inverter?

Going forward expect most large scale energy plants that get built to be solar plants. Monitoring your Sungrow inverter is the best way to capitalise on your solar savings, as it lets you figure out how to best optimise your energy usage.

How do I set up WiFi on my Sungrow inverter?

Begin by navigating through the display panel on your Sungrow inverter. This display allows you to access various settings. Use the display buttons to locate the WiFi Setup option. Once you select the WiFi setup option, the inverter will activate its WiFi hotspot mode.

How can a solar retailer create a Sungrow inverter?

A solar retailer has two installers (installer A and contractor B). The solar retailer can share the organisation code to the installers when they register an installer account. Once installers have their installer accounts, they can create plants (add Sungrow inverters in iSolarCloud) via their installer accounts for their customers.

Are Sungrow solar inverters reliable?
