

What is a Sungrow logger 1000?

This combination does not exist. We'll notify you once the product is back in stock. **LOGGER1000** The Sungrow Logger 1000 is used for commercial and industrial sites where multiple Sungrow three phase inverters are installed. It is a data logger that can connect up to 30 inverters.

How do I connect my inverter to the logger1000?

Connect to Logger1000 via the RS485 cable from the energy meter on RS485 port A2 and B2. Connect the RS485 comms from the inverter(s) via A1/B1 and the energy meter via A2/B2 (can be connect to A3/B3 if A2/B2 is occupied by inverters) to the Logger1000 as an example.

Which Sungrow Power three-phase inverters are compatible with logger1000?

This document only applies to Sungrow Power three-phase inverters (including SG5KTL-MT, SG10KTL-MT, SG15KTL-M, SG20KTL-M) with Logger1000. The information in this document may contain predictive statements including, without limitation, statements regarding the future financial and operating results, future product portfolio, new technology, etc.

How to check if a Sungrow inverter is working?

Navigate to 'Device' and click 'Device List' section and click 'Auto search'. Sungrow inverters will be automatically detected as long as they are correctly connected and energized. Green icon indicates the connection works and red icon means no connection between Logger1000 and the device.

How does logger1000 work?

network. The Logger1000 supports various communication manners such as WiFi and 4G. The Logger1000 can be connected to various environment sensors, Smart Energy Meters, Meteo Stations, and inverters in the PV power generation system via an RS485 bus. Users can access the Web interface via mobile phone

How do I upgrade the Sungrow residential inverter?

date function is used to upgrade the SUNGROW residential inverter and string inverter. Step 1 Click 'Device' -> 'Firmware Update' to enter the corresponding interface. Step 2 Click the button 'Select a Firmware File'. Select an upgrading file and import it to the system. Matching invert

The Logger1000 can be connected to various environment sensors, Smart Energy Meters, Meteo Stations, and inverters in the PV power generation system via an RS485 bus.

The Logger1000 is a data acquisition, protocol conversion device suitable for inverters, combiner boxes, meteo stations, and energy meters in PV power plants. It supports ...

**SMART AND FLEXIBLE** o Intelligent communication and control of the data collection o Communication

with up to 200 devices o Built-in Web for commissioning and O& M SAFE AND ...

On the logger1000 side, A1 and B1 are terminals to connect with the inverter which display as COM1 on the Logger1000 web portal; A2 and B2 are the terminals to connect ...

V112 inverter DTSD1352 6A\* no yes, 1 per host inverter CT from 3rd party manufacturer DTSU666-20\*/\*\* yes, for SHxxRT-20 yes, 1 per host inverter 3x 100 A / 330 mV ...

It is a data logger that can connect up to 30 inverters. While it coordinates the capture of data across multiple inverters it can also coordinate export control of all of the inverters and ...
