

What happens if my Sungrow inverter disconnects from my WiFi network?

If your Sungrow inverter loses its WiFi connection, it will not affect your solar energy system's ability to produce energy. However, it will prohibit communication with the Sungrow iSolarCloud server, preventing you from viewing your solar production information. You can still access your inverter physically.

Do Sungrow inverters have Wi-Fi?

Before attempting to reconnect, it is helpful to understand the Sungrow Wi-Fi devices and their functionality. Depending on the model, Sungrow Inverters either come with a Wi-Fi dongle or an eShow Screen that plugs into the bottom of the inverter, both of which can be used to connect the inverter to the internet wirelessly.

How do I reconnect my Sungrow inverter?

To reconnect your Sungrow inverter, follow these steps: Ensure you have physical access to your inverter and a WiFi-enabled device. The average reconnection time is 10 minutes. Go to your device's Settings menu, locate the WiFi settings, and select the inverter WiFi network named SG-*****.

Why is my Sungrow Wi-Fi not working?

There are issues with the Wi-Fi signal from the internet router. For example, weak signal or incompatible signal. The internet password / the router itself has been changed. The inverter is turned off. Before attempting to reconnect, it is helpful to understand the Sungrow Wi-Fi devices and their functionality.

How do I connect a Sungrow inverter to a modem?

Place the WiFi extender about half-way between the Sungrow Inverter and the modem. Connect the WiFi extender to your modem using the device's instructions (WPS function recommended for ease of set-up). As the Sungrow inverter is now going to communicate with a new device, it will be necessary to reconfigure the WiFi.

Why is my Sungrow inverter not displaying data on isolarcloud?

If your Sungrow Inverter isn't displaying data on the iSolarCloud app or it says 'offline', the issue (more often than not) is that your Sungrow Inverter has disconnected from your WiFi network. Don't stress! This only means your system isn't sending data to the monitoring portal. It doesn't mean that your system isn't working.

If you have problems with your Sungrow inverter, your first port of call is the original installer. ... We have a 5.4 kWp Sungrow inverter model SG5KTL-D, with Wifi, which has so far performed faultlessly, and the Wifi data logging has ...

of the inverter. If the inverter does not have a QR code, simply click Manually and type in the Serial Number (SN) of the inverter and click Next and Confirm (Figure 6). Figure 6 Inverter QR Code / SN Important Note: When using the Ethernet feature, the SN of the Inverter must be used during plant setup. DO NOT scan or use the SN of the Wi-Fi ...

Here is how to get your Sungrow inverter WiFi reconnected. Note: If your inverter has disconnected from your WiFi network, this will not affect your solar energy system's ability to produce energy. It will only prohibit ...
