

How does Tesla suggest charging stations?

Your Tesla automatically finds the best route and suggests charging stations along the way. Finds the best route to avoid traffic and charge if needed. Gives real-time battery estimates based on your driving style. Offers charging location recommendations along your route.

Where can I charge my Tesla?

Charging your Tesla is fast, convenient and available anywhere with electricity. You can plug in at home or at nearby public chargers, charge at local Superchargers or at your workplace, recharge at Superchargers on the way or at your destination, and charge at home for a charged battery every day. Our charging options are designed for every property.

Does Tesla have an EV charging network?

Tesla has invested a huge amount of money and resources into creating its own infrastructure and charging network for its vehicle owners - with the specialist EV manufacturer having installed over 1,000 Superchargers in the UK and Ireland since 2014. That makes it one of the most expansive EV charging network providers in the country.

How do I pay for a charging session at a Tesla Supercharger?

All fees for charging at Superchargers are billed through your Tesla account to your primary card. You won't pay via a credit card directly at the station. The cost of your current charging session is available on your Tesla screen in the 'charging' section.

Does the Tesla Model 3 have a charging station?

It is worth remembering before you use a public charging station that while some of the stations are free to use, others do charge for their service. To ensure that charging is never a problem and to prove that Tesla covers all their bases, the Model 3 comes equipped with a Mobile Connector kit as standard.

What is the cost of charging a Tesla?

The cost of charging a Tesla is 3.6 times cheaper per mile than fueling a gas-powered car. It costs approximately 4.56 cents per mile compared to 16.66 cents per mile for gas vehicles.
