

How much does Tesla charging cost?

Buckle up as we navigate through the electrifying world of Tesla charging costs. When charging at a Tesla charging station, the cost can range from \$0.25 to \$0.50 per kilowatt-hour using Tesla's Superchargers. This translates to spending about twice as much as charging at home, with variations based on the model and electricity rates.

What is the cost range to fully charge a Tesla Model S?

Fully charging Tesla Model S costs anywhere from \$5.00 to \$80.00. Fully charging Tesla Model 3 Standard Range costs anywhere from \$2.50 to \$40.00. Fully charging Tesla Model 3 Long Range costs anywhere from \$3.75 to \$60.00. Fully charging Tesla Model 3 Performance costs anywhere from \$3.75 to \$60.00.

How much does it cost to charge a Tesla Model X?

To charge a Tesla Model X from 20% to 90%, it costs \$35.00 at a Supercharger station. This corresponds to 70 kWh of energy. Charging at home is the cheapest way to fill up a Tesla.

How much does it cost to supercharge a Tesla Model S?

At a \$0.50 Supercharger electricity cost, it will cost \$50.00 to fully supercharge a Tesla Model S (from 0% to 100%).

Can a Tesla Supercharger charge a car at home?

Using a Level 2 charger at home is a cost-efficient option, as home charging can be nearly three times cheaper than fueling a car with gas. Tesla Superchargers use a maximum rate of up to 250 kW, making them the fastest charging option available. The Supercharger network has over 50,000 stations, offering fast charging on the go.

How much does it cost to charge a Tesla Model 3?

The cost to fully charge a Tesla Model 3 varies depending on the model and your location. Fully charging a Model 3 Standard Range costs anywhere from \$2.50 to \$40.00, while the Long Range and Performance models cost between \$3.75 and \$60.00.
