

Tesla charging stations work on other cars

Can I use other electric cars with Tesla Chargers?

Yes, other electric cars can use Tesla chargers with the help of adapters. Tesla chargers, including the Mobile Connector, Wall Connector, and Destination Charger, can accommodate J1772 EVs with the use of Tesla to J1772 charger adapters.

What charger does a Tesla not use?

All EVs sold in North America, except for Teslas, use the J1772 connector for charging. Think of Teslas as the iPhones of the EV world with the proprietary Lightning charger, while all non-Tesla vehicles are the Androids using the generic USB-C charger.

How can I charge a non-Tesla vehicle?

To charge a non-Tesla vehicle using a Tesla charger, non-Tesla drivers must use at least version 4.18.0 of the Tesla app. Press the 'Charge Your Non-Tesla' option and a prompt will ask you to add a payment method to begin charging. Other electric cars can use CCS common connections with Tesla's Superchargers.

Can a Tesla Charger be used with other EVs?

Tesla's chargers are designed specifically for Tesla vehicles and use a proprietary charging protocol that is not compatible with other EVs. While Tesla's Supercharger network is one of the most extensive in the world, it is not a universal charging system that can be used with all EVs. Why Can't a Tesla Charger be Used for Other Cars?

Does a Tesla Charger work with a non-Tesla EV?

While some Tesla chargers may be compatible with other EVs that use the same charging connector, it is not a universal charging system that can be used with all EVs. If you own a non-Tesla EV, it is best to use a charger that is designed specifically for your vehicle.

How do I use a Tesla Charger?

Plug the connector into the car. This may be a little trickier for some cars than for others, as Tesla chargers are designed for use with cars that have charging ports at the back on the passenger side - you may have to park a little creatively should your charging port be in a different location. Select your charger number on the app.

In the UK and other European countries, Tesla uses CCS connectors at its Supercharger stations, making it easier for non-Tesla EVs to plug in. Make sure your EV uses a CCS connector to ensure compatibility.

You can also purchase an adapter bundle and charge with other outlet types. Commonly used in homes to power larger appliances, a 240 volt outlet will supply up to 30 miles of range per hour of charge. ... Charging ...
