

How many charges can the solar power bank hold?

The solar power bank holds up to five charges, ensuring you won't end up with any dead devices, no matter where you are. Its solar panels let you charge it up with some sunlight or with a USB-C chord - whichever option is most convenient. There's a good reason it's considered the top solar power bank on the market.

Are solar power banks a good idea?

Solar power banks are awesome as they are environmentally-friendly and can maintain their charge without any electricity. Having a solar power bank means being able to charge all your electronics anywhere, any time. Sunlight is all you need to charge your gear on the go.

How do you charge a solar power bank?

Most solar power banks have two power options - wall charging and solar charging. To charge a solar power bank, your best bet for a quick-charge is to plug it in and use the sun rays to keep things kicking.

How many USB ports should a solar power bank have?

The number of USB ports depends on your needs. If you have multiple devices like a mobile phone and a tablet, 2 USB ports would be preferable. However, if you're in a group, having more is better. Most solar power banks offer two power options: wall charging and solar charging.

How does a solar power bank function?

A solar power bank, such as the one featured, charges up quickly via solar energy or with two different USB cables. It offers versatility by providing multiple charging options. Additionally, it serves as a large, super-bright LED flashlight with 3 different modes, making it ideal for avid campers or off-the-beaten-track travelers.

What's the advantage of using a solar power bank?

A huge advantage of using a solar power bank is that they're environmentally-friendly and can maintain their charge without any electricity. Sunlight is all you need to charge your gear on the go.
