

What is Toledo Solar?

Toledo Solar is a new company formed via a \$30 million initiative led by the Atlas Venture Group. It has set up its flagship manufacturing facility in the old Willard & Kelsey Solar Group building in Perrysburg, Ohio. Toledo Solar was established in part due to First Solar's dominance in the CdTe market.

Does Toledo Solar sell solar panels?

Toledo Solar manufactures and sells solar panels. Since the company's manufacturing output is small, they work directly with customers on multi-year contracts. 'We don't sell solar panels to everybody just because the market's so much bigger than our capacity', Bates said. 'We're good with 100 MW now. We're on a 30-acre site, so this facility maxes out at 800 MW of annual production.'

Will Toledo solar reach 850 MW by 2026?

Toledo Solar will reach an annual manufacturing output of 850 MW by 2026, according to the company's demand projections.

How many people currently work at Toledo Solar?

Toledo Solar's facility has an annual manufacturing capacity of 100 MW and currently employs 25 people. The company plans to reach a workforce of 70 by the end of the year.

How many megawatt solar arrays were developed in Toledo?

A 2.5 megawatt solar array was developed across two sites in Toledo's Overland Industrial Park.

Will Toledo solar compete with First Solar?

Toledo Solar's 100-MW production line will not directly compete with First Solar's utility-scale dominance. Instead, it will supply the residential and commercial markets with an alternative to traditional crystalline silicon solar modules.
