

How does a USB car charger function?

A USB car charger uses two standard USB-A ports to power up your devices. It sits flush with the car's outlet and has integrated lighting for each port, making them easy to find in the dark.

How much power does a USB car charger provide?

This USB car charger offers 2.4 amps of current through its USB-A port, without quick charging. For full performance, use a USB-C cable and the Type C port, which puts out up to 45 watts of power.

How many USB ports do I need in a car charger?

When you're traveling with multiple gadgets, even four USB ports won't be enough to charge everything at the same time. It's easy to find car chargers with one or two USB ports, but for charging multiple devices simultaneously, consider chargers with three or four ports.

Which port on the charger supports quick charging?

The USB car charger puts out 2.4 amps of current, without quick charging, through the USB-A port. To get full performance, including quick charging, you'll need a USB-C cable and use the Type C port.

What makes this USB car charger a good choice?

This USB car charger is a good choice because it offers dual fast-charging ports, power, warranty and price point. It also includes a USB-A port for older charging cables and is made by a reliable brand, Anker.

How can I choose a fast USB car charger?

To choose a fast USB car charger, look for ones that are Qualcomm Quick Charge 3.0 certified, also called Power Delivery (PD). These chargers provide a guaranteed 36 watts to compatible devices and deliver the fastest speed.

Specifically, the Delta 2 features six standard AC wall outlets, a DC car plug (12 volts), two 5.5-mm DC barrel plugs (DC5521), two USB-C (100-W max) ports, two USB-A Fast Charge (18-W max) ports ...
