How many solar companies are in Virginia? There are 15 solar companies in Virginia on the EnergySage Marketplace.

How many solar companies are there in Virginia?

There are 15 solar companies in Virginia on the EnergySage Marketplace. Should you choose a local or national solar installer? According to a study by the National Renewable Energy Laboratory (NREL), solar quotes from national installers are about 10 percent higher, on average, compared to those provided by local installers.

How much do solar panels cost in Virginia?

At \$2.85 per watt, the average cost of solar panels in Virginia is the same as the national average. So, a standard 8 kilowatt (kW) solar panel system would cost about \$22,800 before any incentives apply. Below is a table that shows the average pricing of our picks for Virginia's best solar installation companies.

Is Virginia a good place to use solar energy?

Virginia's sunny conditions make it a great place to use solar energy. According to the Solar Energy Industries Association (SEIA), it's one of the top 10 states for solar energy and has invested \$4.8 million in solar power as of December 2022.

Does Virginia have solar power?

Virginia does not compete with California or Texas for solar power capacity, but the state's growth chart has been impressive. The SEIA predicts Virginia's solar capacity will grow more than 7 gigawatts (GW) in the next five years, enough to power about a million homes.

Can you sell solar panels to a utility company in Virginia?

Virginia solar owners earn one SREC for each megawatt-hour (MWh) of energy their panels produce. You can sell these SRECs to your utility company to make money back. Virginia solar customers who purchase their systems in full or take out a loan also qualify for the federal solar tax credit, referred to as the Residential Clean Energy Credit.
